STRIP DOOR SYSTEMS TO SUIT ANY APPLICATION!

North Americas Premier Strip Door Manufacture & Distributor

Universal Strip Curtain Hardware (P2) – Quick Snap Bullet Hardware (P2) – Loop Mount Systems (P3) – Stand Off Mount Systems (P4) – Sliding & Accordion Strip Curtains (P4-6) - Strip Curtain Frames - Hood Enclosures (P7) – Velcro Systems (P8) – Common Applications (P9)

INDUSTRIAL HD- UNIVERSAL STANDARD

Strongest System Available - Ideal for Industrial and High Traffic

Wall Mount

Replace Strips by Removing Retainer Plates - 14 Gauge Galvanized Hardware. Available in 3,4 and 5' lengths...

Stainless Steel Also Available

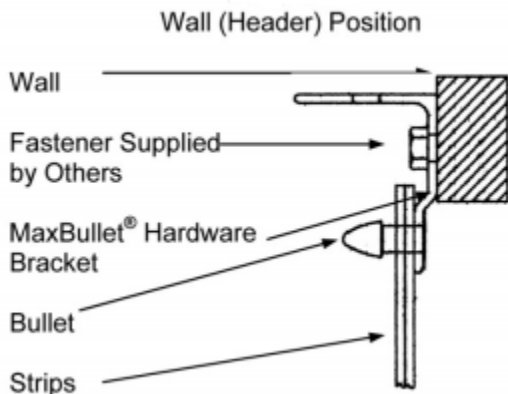

- A - Header Mount
- B - Wall Mount
- C - Suspension Mount

Strips are pinched between Retainer Plate and Studded Hardware. The Industrial HD system in the strongest way to secure strips and thus very common in high traffic applications with machine and/or vehicle traffic (Fork Lifts, Tow Motors, Trucks, etc)

NEW QUICK-SNAP HARDWARE!

Simply Snap Strips Into Position - Medium Traffic

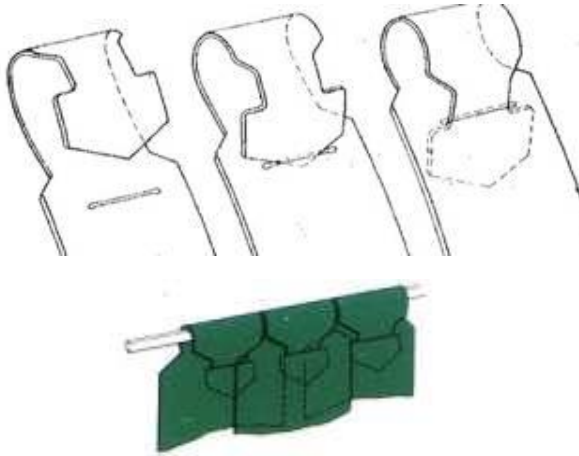

Less Tools Required ...Makes Installation Faster...Ideal when frequent strip replacement is required. Common for doors up to 10' H in Food Service Applications

Upgrade to Powder Coated for a Commercial Look

EASY LOOP SYSTEM (LOW PROFILE) – PRE CONFIGURED OVERLAP!

Slide Around A Pipe or Bar — Self Fastening!

Wall or Header Mount

Looped strips are common in 4", 6" and 8" widths

Tongue and Groove Construction lets each individual strip lock over mounting bar with a simple twist of the wrist.

Patented Loop™ Design

Patented Loop™ strip attachments satisfy two major needs – safety and installation ease. Special safety release design releases strips from mounting on bars, if caught on a vehicle passing through, before the entire bracket assembly is dislodged.

Also, tongue-and-groove construction lets each individual strip lock over the mounting bar with a simple twist of the wrist. All hardware is included, and no special tools are required. Common in food service applications and applications where strips can be hung around a rod/tube or flat bar. Also common for applications where standard overlap is required....Customer will often provide their own bar.

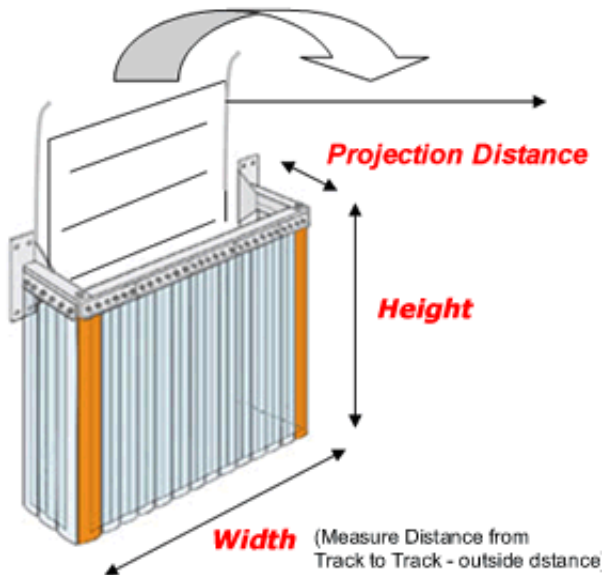

Aluminum Rail Shown is 1.5" X 1/4"

STAND OFF MOUNT SYSTEMS - **ALLOWS A STRIP DOOR TO BE INSTALLED AROUND AN** **OVERHEAD DOOR!**

Stand Off Strip Door Design

Stand-off Mount Hardware allows for installation of a strip door for a doorway where there is an existing conventional roll-up door. The Stand-off hardware brackets are installed on either side of the roll-up door hardware. They are available in three stand-off depths 12", 18", and 24" to suit the amount of clearance required for the existing door. When measuring for a stand-off door, 3 measurements are necessary....1) Track to Track Distance, (Outside to Outside), meaning the track that the overhead door rolls on...2) Projection Distance and 3) The Height....

A 3 Sided Enclosure is created around the overhead door

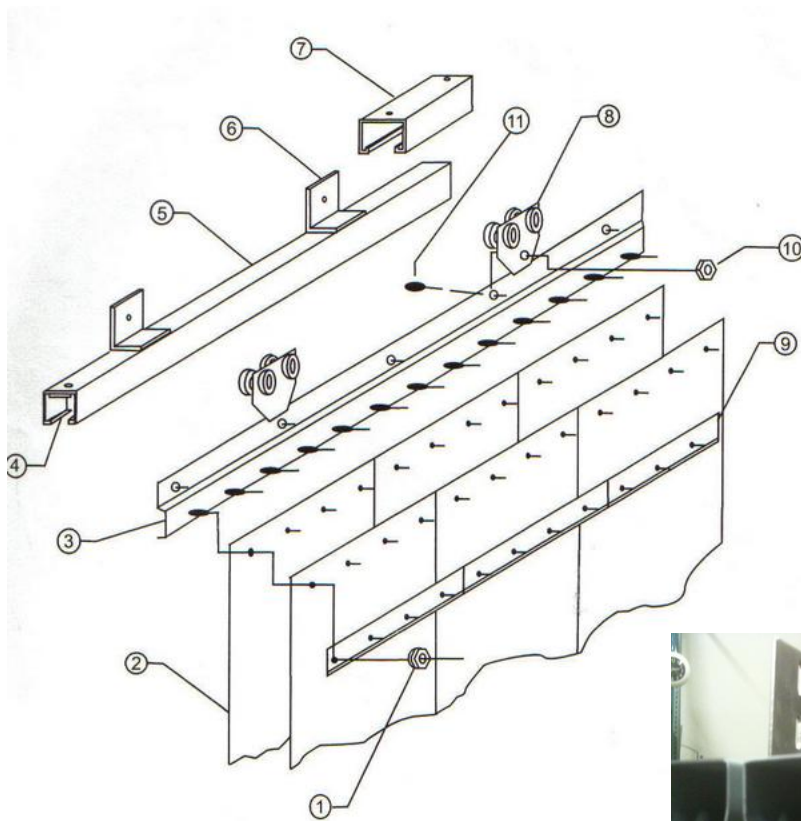

**12" Projection Bracket ...Strips
attach to the sides**

14" , 16" , 24" Available

SLIDING SYSTEMS – BI PASSING – BI PARTING

Ball Bearing Wheel Trolleys Allow for Sliding Strip Curtains !

1. 1 – Lock Nuts
2. PVC Strips
3. Mounting Plate
4. End Track Stop
5. RT – Track
6. Wall Mount Bracket
7. Splice Connector
8. Steel 4 Wheel Trolley
9. Retainer Plate - Strip Clamp
10. Nut
11. Bolt

Heavy Duty 4 Wheel Ball Bearing Trolleys (16 ST)

Bi Passing System...One strip Curtain Panel can slide in Front of the other with double track connector

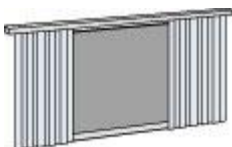

Create Fixed Sliding Panels – Install two tracks to create a BI PASSING system.

SLIDING SYSTEMS – SINGLE SLIDING

Slide Your Strip Curtains To The Left or Right...

Bi Parting Fixed Panel

Single Sliding Fixed Panel
